With the aim to boost links with promising young clinicians specialising in urological cancers, the EAU Section of Oncological Urology (ESOU) has developed the STEPS programme (Sessions To Evaluate ProgresS in the management of urological cancers). Piloted in 2011, STEPS will celebrate its 6th Anniversary in January 2016 at the 13th ESOU Meeting in Warsaw.

Twenty young clinicians who are already practising, or who have a firm career interest, in onco-urology are selected annually through an open application process to meet established experts in the fields of prostate, bladder, renal and testicular cancer. To date 60 young clinicians have already enjoyed this unique learning and networking experience, with feedback being overwhelmingly positive.

STEPS allows young clinicians take part in a closed-door case discussion which aims to:

- Offer an innovative educational opportunity to selected young clinicians
- Strengthen ties between ESOU and talented younger clinicians in uro-oncology
- Boost the participant's professional network with both established and emerging experts in uro-oncology.
